Preface	xxix

PART 1 INFORMATION AND SYSTEMS SECURITY

SECTION 1 Theory/Reviews of the field

CHAPTER 1 System Security Engineering for Information Systems.....	5
Introduction.....	5
System security engineering history	6
Established system security engineering methods, processes, and tools	8
Modern and emerging system security engineering methods, processes, and tools.....	13
Conclusion	20
Recommendations.....	20
Disclaimer	20
Acknowledgments	21
References.....	21
Further reading	23
CHAPTER 2 Metrics and Indicators as Key Organizational Assets for ICT Security Assessment.....	25
Introduction.....	25
GOCAME strategy overview	26
Security evaluation for a web system: A proof of concept.....	34
Related work.....	42
Conclusion and future work	43
References.....	43

CHAPTER 3	A Fresh Look at Semantic Natural Language Information Assurance and Security: NL IAS from Watermarking and Downgrading to Discovering Unintended Inferences and Situational Conceptual Defaults	45
	Introduction.....	45
	Early breakthrough in NL IAS.....	46
	A sketch of ontological semantic technology.....	51
	Mature semantic NL IAS	54
	Summary	60
	Acknowledgments	60
	References.....	60
SECTION 2	Methods	
CHAPTER 4	An Approach to Facilitate Security Assurance for Information Sharing and Exchange in Big-Data Applications	65
	Introduction.....	65
	UML extensions for XML security.....	68
	Extensions for policy modeling and integration.....	70
	Integrating local security policies into a global security policy	74
	Related work.....	81
	Conclusion	82
	References.....	83
CHAPTER 5	Gamification of Information Security Awareness Training.....	85
	Introduction.....	85
	Literature review.....	86
	Gamification system	89
	Conclusion and future plans.....	95
	Acknowledgments	96
	References.....	96
CHAPTER 6	A Conceptual Framework for Information Security Awareness, Assessment, and Training	99
	Introduction.....	99
	Background and literature	100
	Human factors and information security.....	102
	Information security learning continuum.....	102
	Dimensions of information security awareness	104

	A field study	105
	Concluding remarks.....	108
	References.....	109
	Further Reading	110
CHAPTER 7	Security Projects for Systems and Networking Professionals	111
	Introduction.....	111
	Background.....	112
	Cryptography	112
	Wireless network security	117
	Conclusion	120
	References.....	120
	Further Reading	122
SECTION 3	Case study	
CHAPTER 8	Assessing the Role of Governments in Securing E-Business: The Case of Jordan.....	125
	Introduction.....	125
	Literature review.....	126
	Security in Jordan’s E-business initiatives: An analysis	129
	Conclusion and recommendations.....	134
	References.....	134

PART 2 NETWORK AND INFRASTRUCTURE SECURITY

SECTION 4 Theory Reviews of the field

CHAPTER 9	A Survey of Quantum Key Distribution (QKD) Technologies	141
	Cryptography	141
	Quantum key distribution.....	142
	Quantum key distribution systems	143
	The future of QKD	146
	A military QKD usage scenario	149
	Conclusion	150
	Disclaimer.....	150
	Acknowledgments	150
	References.....	150

CHAPTER 10 Advances in Self-Security of Agent-Based Intrusion Detection Systems.....	153
Introduction.....	153
Overview.....	154
Framework for self-security, self-reliability and self-integrity of agent-based IDSs	156
Prototyping and extending IDS-NIDIA	165
Tests	165
Related works	166
Conclusion	168
Acknowledgments	169
References.....	169
Further reading	171
CHAPTER 11 Secure Communication in Fiber-Optic Networks	173
Introduction.....	173
Confidentiality	174
Privacy and optical steganography.....	177
Availability	179
Summary	180
References.....	181
SECTION 5 Methods	
CHAPTER 12 Advanced Security Network Metrics	187
Introduction.....	187
Related work	188
Method description	189
Metrics definition	193
Description of experiments	195
Results of experiments	199
Conclusion	201
References.....	201
CHAPTER 13 Designing Trustworthy Software Systems Using the NFR Approach	203
Introduction.....	203
The NFR approach	205

The Phoenix system and trustworthiness deficit	208
Application of the NFR approach for designing a trustworthy Phoenix system	209
Validation and lessons learned.....	219
Summary	223
Acknowledgments	223
References.....	223
CHAPTER 14 Analyzing the Ergodic Secrecy Rates of Cooperative Amplify-and-Forward Relay Networks over Generalized Fading Channels	227
Introduction.....	227
Secure cooperative wireless communications.....	229
Computational results	231
Conclusion	240
Appendix.....	241
References.....	242
CHAPTER 15 Algebraic Approaches to a Network-Type Private Information Retrieval	245
Introduction.....	245
The data processing scheme and statement of the problem	246
Algorithmic description of the solution	247
Algebraic description of the solution.....	249
Conclusion	251
Summary	251
References.....	251
CHAPTER 16 Using Event Reasoning for Trajectory Tracking.....	253
Introduction.....	253
Example	254
Event model.....	255
Scenario adapts.....	257
Event functions and inference rules.....	259
Experiments	262
Summary	264
Acknowledgments	265
References.....	265

CHAPTER 17 Resource-Efficient Multi-Source Authentication Utilizing Split-Join One-Way Key Chain.....	267
Introduction.....	267
Related works	268
Methodology	270
Conclusion	278
Acknowledgments	278
References.....	278
CHAPTER 18 Real-time Network Intrusion Detection Using Hadoop-Based Bayesian Classifier	281
Introduction.....	281
Overview on Hadoop based technologies.....	282
Survey of Intrusion Detection Systems.....	285
Hadoop-based real-time Intrusion Detection: System architecture	289
Practical application scenario and system evaluation.....	290
Summary	298
References.....	298
CHAPTER 19 Optimum Countermeasure Portfolio Selection: A Knapsack Approach	301
Introduction.....	301
The Knapsack problem and a dynamic programming solution.....	303
Problem description.....	304
The proposed binary knapsack-based approach and its dynamic programming algorithm.....	306
Computational example and comparison.....	309
Conclusion	312
References.....	313
CHAPTER 20 CSRF and Big Data: Rethinking Cross-Site Request Forgery in Light of Big Data	315
Introduction.....	315
SOP and CSRF	316
Motivation and related work	319
Defenses against CSRF: Server and browser Sides.....	322
Experiment results: CSRF in social media and networking sites	324
Analysis of test framework with popular Web/URL scanning tools	330

Conclusions and future work.....	332
References.....	333
CHAPTER 21 Security through Emulation-Based Processor Diversification	335
Introduction.....	335
Background and challenges.....	337
Proposed security approach.....	340
A case study: Web server.....	344
Experimentation and results	349
Discussion	353
Conclusions and future work.....	354
Acknowledgments	355
References.....	355
CHAPTER 22 On the Use of Unsupervised Techniques for Fraud Detection in VoIP Networks	359
Introduction.....	359
Background.....	360
Signature-based fraud detection	364
Experiments	367
Conclusion	372
References.....	372
 PART 3 MOBILE AND CLOUD COMPUTING	
<hr/>	
SECTION 6 Reviews of the field	
CHAPTER 23 Emerging Security Challenges in Cloud Computing, from Infrastructure-Based Security to Proposed Provisioned Cloud Infrastructure	379
Introduction.....	379
Background.....	381
Infrastructure security.....	381
Cloud service models	384
Provisioned access control infrastructure (DACI).....	392
Conclusion	392
References.....	393

SECTION 7 Methods

CHAPTER 24 Detection of Intent-Based Vulnerabilities in Android Applications 397

- Introduction.....397
- Comparison to related work398
- Model definition and notations399
- Vulnerability modeling.....402
- Security testing methodology.....404
- Implementation and experimentation.....411
- Conclusion416
- Acknowledgments416
- References.....416

PART 4 CYBER CRIME AND CYBER TERRORISM

SECTION 8 Theory

CHAPTER 25 A Quick Perspective on the Current State in Cybersecurity..... 423

- Introduction.....423
- The scope of cybersecurity.....423
- Contributions424
- Understanding the scope of cybersecurity424
- Malware, the infectious disease, and phishing, the fraud.....426
- Vulnerabilities: The long exploitable holes430
- Data breach: A faulty containment432
- Cyber-war, the latest war front433
- Lessons learned.....436
- References.....437

CHAPTER 26 A Paradigm Shift in Cyberspace Security..... 443

- Introduction.....443
- Cyber-terrorism.....443
- A security paradigm shift in cyberspace.....445
- Intelligent agents in security auditing.....446
- Summary450
- References.....450

SECTION 9 Methods

CHAPTER 27 Counter Cyber Attacks By Semantic Networks	455
Introduction.....	455
Related work.....	456
Methodology.....	457
Experiments	461
Conclusion and future work.....	465
Acknowledgments	466
References.....	466
CHAPTER 28 Man-in-the-Browser Attacks in Modern Web Browsers	469
Introduction.....	469
Chapter overview.....	470
Related work.....	471
Browser architecture.....	471
Man-in-the-browser attacks on different layers.....	472
Countermeasures.....	477
Conclusion	479
References.....	480
CHAPTER 29 Improving Security in Web Sessions: Special Management of Cookies	481
Introduction.....	481
Related work.....	482
Proposed mechanism for web session management.....	484
Implementation and experiments	486
Conclusion and further work.....	489
References.....	490
CHAPTER 30 Leveraging Semantic Web Technologies for Access Control	493
Introduction.....	493
Implementing RBAC with ontologies.....	494
Semantically extending the XACML attribute model.....	495
Ontology-based context awareness	496
Ontological specification of user preferences.....	497
Semantic access control in online social networks.....	498
DEMONS ontological access control model	499
Discussion	502

Acknowledgments503
References.....504

CHAPTER 31 Cyber Security Education: The Merits of Firewall Exercises 507

Introduction.....507
Criteria for firewall education.....508
Evaluation of firewall exercises509
Satisfying the criteria.....511
Emerging trends in firewall education.....514
Conclusion514
Acknowledgments515
References.....515

SECTION 10 Case study

**CHAPTER 32 Surveillance without Borders: The Case of Karen Refugees
in Sheffield..... 519**

Introduction.....519
Background.....520
Methodological issues523
Analyzing discourse524
The hacking incident524
“We are Watching You”: Analysis of discourse messages posted527
Conclusion530
Appendix.....531
References.....532
Further Reading533

**PART 5 FOCUS TOPICS: FROM ONLINE RADICALISATION
TO ONLINE FINANCIAL CRIME**

SECTION 11 Theory

**CHAPTER 33 A Framework for the Investigation and Modeling of Online
Radicalization and the Identification of Radicalized Individuals.....539**

Introduction.....539
Systematic consideration of influencing factors: The
radicalization-factor model.....541

Identification of radicalized individuals: Behavioral indicators..... 543
 Application of the framework 545
 References..... 546

CHAPTER 34 Preventing Terrorism Together: A Framework to Provide Social Media Anti-Radicalization Training for Credible Community Voices 549

Introduction..... 549
 Online radicalization 551
 Collaboration in counter-terrorism..... 553
 Credible voices 554
 Conclusion 555
 References..... 555

SECTION 12 Methods

CHAPTER 35 Investigating Radicalized Individual Profiles through Fuzzy Cognitive Maps..... 559

Introduction..... 559
 The radicalization process: How can it happen? 560
 Investigating radical online profiles: A short overview of existing methods 564
 Fuzzy cognitive mapping of factors for self-radicalization as an alternative approach 567
 Conclusion 571
 References..... 572

CHAPTER 36 Financial Security against Money Laundering: A Survey..... 577

Money laundering..... 577
 Anti-money laundering efforts 579
 Estimating the extent of ML 581
 Data mining techniques for ML detection 585
 Conclusion 587
 References..... 588

CHAPTER 37 Intelligent Banking XML Encryption Using Effective Fuzzy Logic	591
Introduction.....	591
Literature review.....	592
System model and design.....	594
Experiments and results.....	601
Summary	612
References.....	615
Further Reading	617
Index	619

Acknowledgments

We wish to thank everyone who has contributed to this book. In particular, we would like to acknowledge the contribution of CENTRIC (Centre of excellence in terrorism, resilience, intelligence & organised crime research, at Sheffield Hallam University, UK). We would also like to take this opportunity to express our gratitude to the following as members of the book review board for their contributions to the final publication.

Review Board

Babak Akhgar
Hamid R. Arabnia
Ben Brewster
Richard Hill
Hamid Jahankhani
Kayleigh Johnson
Eleanor Lockley
Reza Nasserzadeh
Simon Polovina
Jawed Siddiqi

About the Editors

Babak Akhgar

Babak Akhgar is Professor of Informatics and Director of the Centre of excellence in terrorism, resilience, intelligence & organised crime research (CENTRIC) at Sheffield Hallam University, and a Fellow of the British Computer Society. Professor Akhgar graduated from Sheffield Hallam University in Software Engineering. After gaining considerable commercial experience as a Strategy Analyst and Methodology Director for several companies, he consolidated this experience by obtaining a masters degree (with distinction) in Information Systems in Management and a PhD in Information Systems. He has more than 100 referred publications in international journals and conference proceedings. He is on the editorial boards of three international journals, and is chair and programme committee member of several international conferences. He has extensive hands-on experience in development, management, and execution of large international KM and security initiatives (e.g., combating terrorism and organized crime, cybersecurity, public order, and cross-cultural ideology polarization). He also has an established network of collaborators in various academic and law enforcement agencies locally, nationally, and internationally. The impact of his research on e-security, manifested in a multi-lingual portal for business crime reduction, and his research on combating organized crime and terrorism led to an international research project with partners such as Europol and a number of LEAs (with a project value of 3.2 M Euro). He has recently written and edited a number of books on intelligence management and national security.

Hamid R. Arabnia

Hamid R. Arabnia received his Ph.D. degree in Computer Science from the University of Kent (Canterbury, England) in 1987 and since October of that year has been a Full Professor of Computer Science at the University of Georgia (Georgia, USA). Professor Arabnia's research interests include parallel and distributed processing techniques and algorithms, supercomputing, interconnection networks, and applications. He is is Editor-in-Chief of the *Journal of Supercomputing* (one of the oldest journals in computer science), published by Springer, and has been Associate Editor of *IEEE Transactions on Information Technology in Biomedicine* (2008–2011). He is also on the editorial and advisory boards of over 35 other journals. Professor Arabnia is the founding chair of the annual World Congress in Computer Science, Computer Engineering, and Applied Computing (WORLDCOMP), and editor of *Transactions on Computational Science and Computational Intelligence* (Springer), and *Transactions on Computer Science and Applied Computing* (Elsevier). Prof. Arabnia has edited/co-edited over 100 books; his most recent co-edited book (*Software Tools and Algorithms for Biological Systems*) is among the top 25 percent most downloaded Springer e-books. Prof. Arabnia has published extensively in journals and refereed conference proceedings. He has over 350 publications (journals, proceedings, editorships) in his area of research. He has been a PI/Co-PI on approximately \$7.5 M worth of externally funded projects/initiatives. During his tenure as Graduate Coordinator/Director of Computer Science (2002–2009), Dr. Arabnia secured the largest level of funding in the history of the department for supporting graduate students (PhD, MS).
